- Lahore, Pakistan

As I speak of myself, I am an artistic and creative graphic designer with a talent for thinking outside the box. My major is 3D modeling and texture, with experience in 3ds Max, Maya, Substance Painter, Unity 3D and Photoshop. Besides my modeling and texturing expertise, I am also skilled in animating and rigging, and much excited to look up to learn new tools and new experiences. And being a fast learner and a games addict, feel it challenging to be given new goals.

My love for art, games and movies helps me go through new ideas every day. I am an aspiring game artist, whose optimism and excitement are contagious. I am the type of person who inspires others to come together; to achieve something greater than anyone can do on their own. I believe a positive attitude and a lot of hard work, can move mountains.
